**New Video Available Depicting Surgical Technique
for the MEDPOR® Lower Eyelid Spacer**

Porex Surgical Inc., in collaboration with James Patrinely, M.D. F.A.C.S. and Charles Soparkar, M.D., Ph.D., has developed a new video depicting the surgical technique for the MEDPOR Lower Eyelid Spacer. Because success with the Lower Eyelid Spacer is highly technique dependent, the video further addresses implant mechanics and the management of the most common complications seen within their practice since its first use in 1998.

With meticulous attention given to the techniques shown in this video, Drs. Soparkar and Patrinely have had considerable success with the MEDPOR Lower Eyelid Spacers and describe the implants as “invaluable for their most complicated cases.” Dr. Soparkar states: “The MEDPOR Lower Eyelid Spacer is faster to use and much more powerful than cartilage grafts.”

For more information on the MEDPOR Lower Eyelid Spacer Implant or to request a free copy of the technique video, please contact Porex Surgical at 1-800-521-7321, or by e-mail at surgical.info@porex.com.
