MEDPOR® Orbital Implants Are Now Available in Three Unique Sizes

Porex Surgical Inc. is pleased to announce the immediate release of a 19mm, 21mm, & 23mm sphere manufactured from MEDPOR® Biomaterial. With the introduction of the three new sizes, MEDPOR Biomaterial now offers a range of orbital implants from 14mm to 23mm in diameter.

MEDPOR Ocular Implants provide surgeons with porous, biocompatible materials for orbital reconstruction following enucleation and evisceration procedures. The interconnecting, omnidirectional pore structure of the MEDPOR Biomaterial allows for rapid vascularization and soft tissue ingrowth.

6316 Sphere - 14mm diameter
