## **New MEDPOR® PLUS™ Spheres Promote More Rapid Fibrovascular Ingrowth**

---

The new MEDPOR PLUS Spheres, from Porex Surgical Inc., combine the structure of a standard MEDPOR Sphere with a bioactive glass (Bioglass) mixture. Clinical studies performed by Dr. David Holck, et al show the Bioglass component, mixed throughout the sphere structure, promotes more rapid fibrovascular ingrowth into the MEDPOR PLUS Sphere. Surgeons may select from four sizes: 16, 18, 20, and 22 millimeter diameter spheres.

MEDPOR is a biocompatible porous polyethylene material. The interconnecting, omnidirectional pore structure allows for rapid fibrovascular ingrowth and integration of the patient's tissue. Bioglass is a 100% synthetic graft material that facilitates a healing response when combined with body fluids.

For more information on the MEDPOR PLUS Sphere please contact Porex Surgical at 1-800-521-7321, or visit our website at [www.porexurgical.com](http://www.porexurgical.com).
